NEW TECHNOLOGY

OnSteam© is a new lining material used by Surefit.

* The material is normally referred to as “Technical Leather” because it feels and looks like leather.

OnSteam© is a micro fibre material that allows 6 times higher transport of humidity than leather, thus it absorbs moisture much faster, resulting in greater comfort in footwear.

* **OnSteam©** is anti-bacterial.

* **OnSteam©** is free of chrome and is produced without damage to the CO² balance.

* The manufacturer of **OnSteam©** is certified sustainable.
