# NEW TECHNOLOGY

**OnSteam®** is a new lining material used by Surefit.

\* The material is normally referred to as “Technical Leather” because it feels and looks like leather.

OnSteam® is a micro fibre material that allows 6 times higher transport of humidity than leather, thus it absorbs moisture much faster, the result is greater comfort in footwear.

\* OnSteam® is anti-bacterial.

\* OnSteam® is free of chrome and is produced without damage to the CO<sup>2</sup> balance.

\* The manufacturer of OnSteam® is certified sustainable.

---
