NEW TECHNOLOGY

OnSteam® is a new lining material used by Surefit.

- * The material is normally referred to as “Technical Leather” because it feels and looks like leather.

OnSteam® is a micro fibre material that allows 6 times higher transport of humidity than leather, thus it absorbs moisture much faster, the result is greater comfort in footwear.

- * OnSteam® is anti-bacterial.
- * OnSteam® is free of chrome and is produced without damage to the CO² balance.
- * The manufacturer of OnSteam® is certified sustainable.
