New Technology

OnSteam© is a new lining material used by Surefit.

- The material is normally referred to as “Technical Leather” because it feels and looks like leather.
- OnSteam© is a microfiber material that allows 6 times higher transport of humidity than leather, thus it absorbs moisture much faster, resulting in greater comfort in footwear.
- OnSteam© is anti-bacterial.
- OnSteam© is free of chrome and is produced without damage to the CO2 balance.
- The manufacturer of OnSteam© is certified sustainable.
